Toulouse, France

github.com/Tidiane31225

SKILLS

Linux Terminal usage, file management, and compilation.

Git & GitHub Version control and collaborative workflow.

Python Algorithms, data structures, and problem-solving.

Java Object-Oriented Programming, classes, and inheritance.

EDUCATION

Bachelor in Computer Science (Paul Sabatier University)

2022 – 2026 (In progress)

- Algorithms, Python, Java, SQL, Networking

High School Diploma (Baccalauréat)

2022

- Specialties: Mathematics and Computer Science (NSI) - Honors

PERSONAL PROJECTS

Traveling Salesman Problem

2025

Academic project: development of combinatorial optimization algorithms in C, performance analysis, automated validation in Python, and teamwork.

Association Website

2024

Self-taught initiation and development of a website for Racine'Co (cultural association in Toulouse) using HTML, CSS, JavaScript, and PHP.

SQL Relational database design and SQL querying.

Real Estate Management App (Java / OCaml)
2024

OOP project for property management. Implementation of a storage system in OCaml for data handling.

VOLUNTEERING

Racine n'co Association

Event organization (stage setup/teardown, cashier duties), website contributions.

WORK EXPERIENCE

Manual Laborer – Agency Work

2022 – 2026

- Teamwork
- Safety regulations compliance
- Organization and efficiency

CAREER GOAL

Data & AI Specialization

Passionate about computer science and data exploitation, I aim to develop skills in advanced algorithms, data structuring, and processing. My goal is to become an IT Engineer specialized in Information Systems and Data Management.
